### ExcursionApp

Group project at Henry Bootcamp.

February 2022 - March 2022.

Buenos Aires, Argentina.

- Development of a Single Page Application (SPA). This project is an e-commerce of excursions in Argentina

Features:

- See the excursions available.
- Register and login in the application.
- Add excursions to the cart and pay for them through payment market.
- Have a record of excursions purchased and canceled.
- Contact the administrator of the page through a form.
- Filter excursions with different criteria.
- Search tours by name or location.
- Sort excursions by price.

- As an administrator, you can:

- Ban users.
- Create, edit and delete excursions.
- Have a list of completed user purchases, and be able to cancel them in case there is any anomaly.
- Send an email to all the users who bought a certain excursion.

### Gamming.Life

Individual project at Henry Bootcamp

February 2022

Buenos Aires, Argentina.

- Development of a Single Page Application (SPA), which uses the data collected from the API (rawg.io) to be stored in a local Database (PostgreSQL).
- The SPA allows you to create a new video game through a controlled form.
- In this SPA, all video games can be sorted by rating or name. Also, filter by video game genre, filter between API video games or those created by the user (DB).
- It allows the option to enter the specific details of each video game.
- Search bar that returns the names that contain the information desired by the client.
